

FACTS ABOUT ME

SO, YOU'RE NOT ONLY INTERESTED IN MY DATA SCIENCE EXPERIENCE? NICE. I HOPE THESE RANDOM FACTS ABOUT ME AMUSES YOU! 😊

In High School, I was on the Varsity Bowling Team. I consider myself a third generation bowler as my dad and his dad played league bowling. At that time, my bowling average was 130 and my highest score is 180.

I've always been involved in choirs since middle school. Once I started college, I really missed singing. During my junior year, I finally decided to find other like-minded people to create an a cappella group. Before I graduated, I co-founded the UC Vocaholics (University of Cincinnati) and attended 2 vocal competitions. The UC Vocaholics is still an active group on campus and has gone on to win competition events and awards.

I enjoy my video games. My go-to game during quarantine has been The Sims 4. Besides The Sims, I love visual novel and puzzle video games. I love the Ace Attorney and Professor Layton series. A game that I enjoy that is typically out of my comfort zone is Yakuza 0.

*I am learning how to crochet. Yes, I am aware those are knitting needles, but I think the icon does the job *chuckles*. During quarantine, I started watching makers and crafters streams on Twitch. To give myself a hobby that doesn't require me to stare at screens, I've taken up the hobby. I've only crocheted a dishcloth and now I am working on a beanie.*
